

Waterwatch T35 Tank Sensor Data Sheet

High accuracy radar sensor designed specifically to measure liquid levels in water tanks. Simple to install requiring just 4 self-tapping screws. A 50mm hole is required for concrete tanks.

Email and SMS alert notifications. Comes with a mobile app that you can download [here](#).

Specifications

Specifications	
Model	Waterwatch T35 Tank Sensor
Housing	Polycarbonate + PBT Waterproof and UV resistant Dimensions 130x130mm
Sensor	60GHz Radar sensor Measurement accuracy 0.2% Measurement range 0.15m to 3.5m Operating temperature: -40°C to +85°C
Power	Inbuilt Li battery 3 – 10 year battery life depending on connectivity and reporting rate
Connectivity	Current: Sigfox, 4G/LTE/CatM1/NB-IoT (5G ready)
